Preface	1
About CIAN	3
Introduction: Africa and the 'leapfrog'	5

Part I

The two original quantum leaps

1. The first 'leapfrog': ICT	15
1. Telecoms and development: the turnaround in the 2000s	15
2. Technology and development: strengthening the virtuous circle beyond telecoms	22
3. Development limitations	26
2. The second leap: mobile financial services	29
1. Mobile technology for better access to financial services	29
2. A wide variety of development models	35
3. Positioning of evolving bank and telecoms players	40
4. Key factors for financial inclusion	42
5. Assessment of mobile financial services	47
6. Microsaving and microcredit initiatives	54
7. Microinsurance initiatives	62

Part II

The frog, not the ox: leaps underway

3. E-commerce	77
1. Examination of the e-commerce market and its players	77
2. Various types of player are establishing themselves on this developing market	82
3. Unique attributes of African e-commerce markets	87
4. Obstacles gradually lifting across the whole of the value chain	89
5. Expected developments and impacts on the whole of the economy	96
6. The development of logistics services for the benefit of all economic sectors	97

4. E-government	101
1. E-government and digital solutions for the State	101
2. E-health/m-health	107
3. Using digital to combat inequality	121
5. The road to digital and the platform economy	131
1. DEM: the platform economy at the heart of the digital revolution	131
2. Running a real platform economy	139
3. DEM: the next step for digital technology in Africa	144
4. Digital economy and trust: the blockchain effect in Africa	148
Conclusion: the leaps then the croak	159
List of acronyms	161
Index	165
